

WHAT IS COMPOST?

Compost is an organic, nutrient - rich soil amendment made up of a mixture of decayed and decaying organic matter.

CIC Organic Compost is made from recovered agriculture waste and yard trimmings.

BENEFITS OF CIC ORGANIC COMPOST

Increases organic matter in soil

Improves biological, chemical, and physical characteristics of soil

Protects against soil desertification and soil erosion

Increases soil fertility

Improves soil's ability to retain water and store nutrients

Helps divert organic waste away from the landfill

Compost can help sequester carbon from the atmosphere

100% organic

QUALITY ASSURANCE

For quality assurance, CIC has compiled international regulation to provide ideal standards for the physical, chemical, and biological conditions of compost.

Each batch of compost undergoes immediate pathogen testing, ensuring CIC Organic Compost is **safe to use** and **free of pathogens**.

HOW TO USE CIC ORGANIC COMPOST:

Compost can be used in a variety of ways. As a rule of thumb, compost should be included to the regular maintenance of your soil throughout the year.

Compost dosage and application can be customized to meet your specific soil needs - for any further consultations, do not hesitate to contact us!

APPLICATION AND HOW TO USE

Vegetables and Fruit

Apply 2-3" of compost to the bed prior to growing and top up 1/2" at the base

Flowers

Make custom potting mix with compost or mix 1" of compost to loosen topsoil

Potted Plants

Make custom potting mix with compost or add 1" of compost 2-3 times a year

Trees

Apply 1-2" of compost from the trunk to the dripline of the trees

HOW TO STORE CIC ORGANIC COMPOST

Compost is a living product filled with organisms and micro-biotic bacteria that require aeration, and moisture.

Ensure compost is stored in sheltered area

Ensure compost is well aerated by giving it a mix every 1 - 2 weeks
